Premium Specialty Blends

These award-winning blends are specifically profiled for espresso machines: [🔗](#)

Intelligentsia Black Cat Classic Espresso

\$16.99

Target & more

3.3 ★★★★★ (128)

A staple in the specialty coffee world, this direct-trade blend is known for a syrupy mouthfeel with tasting notes of **dark chocolate**, **ripe cherry**, and **brown sugar**.

WBC World's Best Espresso

\$23.25

Walmart - Bean Box, Inc. & more

4.6 ★★★★★ (254)

Named the best espresso at the World Barista Championship, this high-end blend features complex notes of **sweet dark chocolate**, **orange citrus**, and **wine-like berry**.

Partners Coffee Roasters Bedford

\$21.90

FORMA & more

4.9 ★★★★★ (225)

A highly-rated blend of Colombian and Ethiopian beans, this medium roast is favored for its smooth body and dominant flavors of **caramel**, **molasses**, and **dark chocolate**.

Delegate: AI executes orders against standing rules

Every year, I want you to buy a plant that meets these criteria:

- arrives at my home by July 1
- costs under \$100 delivered
- doesn't repeat any plants I've purchased before
- indoor, low light
- appropriate for Boston climate conditions

AI responses may include mistakes. [Learn more](#)

Not real - hypothetical. For illustrative purposes only.

Delegate may use UCP extensions like AP2 Mandates

Level	Commerce protocol required?	Incremental enablers
1. Discover	Additive	Web index, product feed, structured data
2. Complete	Yes	Checkout, payment handlers, fulfillment
3. Delegate	Yes	AP2 Mandates

Coordinate: AI orchestrates systems toward a goal

Plan for my friend Maya's birthday on July 6

- Book an Italian restaurant with natural wine and vegetarian options
- Invite Jess T, Priya K, Daniel R, Sam L, and Maya
- Order Maya a gift from Plant Proper (indoor, low light, under \$100) delivered to my house by July 5
- Send the dinner invites once the reservation is made

Not real - hypothetical. For illustrative purposes only.

Coordinate is enabled by inter-agent communication

Level	Commerce protocol required?	Incremental enablers
1. Discover	Additive	Web index, product feed, structured data
2. Complete	Yes	Checkout, payment handlers, fulfillment
3. Delegate	Yes	AP2 Mandates
4. Coordinate	Yes	Inter-agent communication via A2A

Good news!

If you're on Shopify,
agentic commerce is
handled for you.

Commerce protocol integration paths

Platform

The **commerce platform** handles implementation.

Custom Build

The **merchant** follows integration steps and joins a waitlist

“Ok.
So how do I rank in AI search?”

Success = accessibility + comprehension + authority

Accessibility

Is your site
reachable to
AI agents?

Comprehension

Is your site
understood by
AI agents?

Authority

Is your site
trusted by
AI agents?

Accessibility

Ensure accessibility at **/robots.txt** and **CDN** layer

- ❑ **Traditional web index:** Googlebot, Bingbot, et al
- ❑ **LLM web index:** Claude-SearchBot, OAI-SearchBot, PerplexityBot
- ❑ **LLM training (optional):** GPTBot, ClaudeBot, Google-Extended
- ❑ **User-triggered actions:** Google-Agent, ChatGPT-User, Claude-User, Perplexity-User
- ❑ **Shopping flow:** Storebot-Google

Comprehension

Most AI bots **do not reliably render** JS!

Render critical content server side.

Critical content to render server side

- ❑ Core HTML on-page factors (title, text, images, links)
- ❑ Structured data (product, reviews)
- ❑ User reviews*
- ❑ FAQs/Q&A*

*Commonly client-side rendered via 3P apps/integrations

Check how JS renders your page content

- ❏ onely.com/tools/wwjd/
- ❏ algorythmic.co/llm-content-visibility-scanner/
- ❏ or just disable JS in your browser for quick checks :)

Product data quality is more
important than ever.

primary data sources = complete + error-free + aligned

- ❑ 3P product feeds (e.g. Google Merchant Center Feed)
- ❑ 1P platform data (e.g. Shopify Catalog)
- ❑ Website content (e.g. PDP HTML)

Most common product feed data quality issues

- ❑ Missing attributes (age group, gender, color, size)
- ❑ Missing identifiers (gtin, mpn, brand)
- ❑ Missing policies (shipping, returns)
- ❑ Image quality (broken, generic, missing, too small)
 - ❑ New minimum: 500 x 500 starting Jan 2027 (best: 1500 x 1500)
- ❑ **Check your Google Merchant Center account for errors/issues**

**Include specs on your
product detail pages.**

what's a good tumbler with a straw and handle for my treadmill

For a treadmill, you want a tumbler that is **leakproof** to handle vibrations and has a **tapered base** to fit into standard equipment cup holders. High-performance options include the **HYDROJUG Traveler Tumbler** for its completely leakproof flip-straw lid and the **Simple Modern Trek Tumbler** for its superior cold retention and stability.  Serious Eats +4

For convenience, it's completely leakproof with the straw down, designed with a flip-straw lid for smooth sipping, and shaped with a cupholder-friendly base. An ergonomic handle ensures comfort when carrying it from work to the trail.

The **HydroJug Traveler** 32oz is a dependable stainless steel water bottle that supports hydration and wellness, making it a reliable choice for both active routines and everyday use.

Dimensions: 3.78" x 5.4" x 9.3"

Base diameter: 3.0"

Capacity: 32 ounces of water ~ 946 mL

Weight: 17.28oz

Can I use the HydroJug Traveler 32oz tumbler for hot drinks?

Does the HydroJug Traveler 32oz fit in a car cup holder?

Yes – the HydroJug Traveler 32oz has a tapered 2.67-inch base, designed to fit most standard car cup holders. As the “just right” middle size in the Traveler lineup, it’s ideal for commuting, errands, or workouts on the go. Since car cup holders can vary, check your vehicle’s dimensions for the most accurate fit.

Why choose the HydroJug Traveler 32oz?

Authority

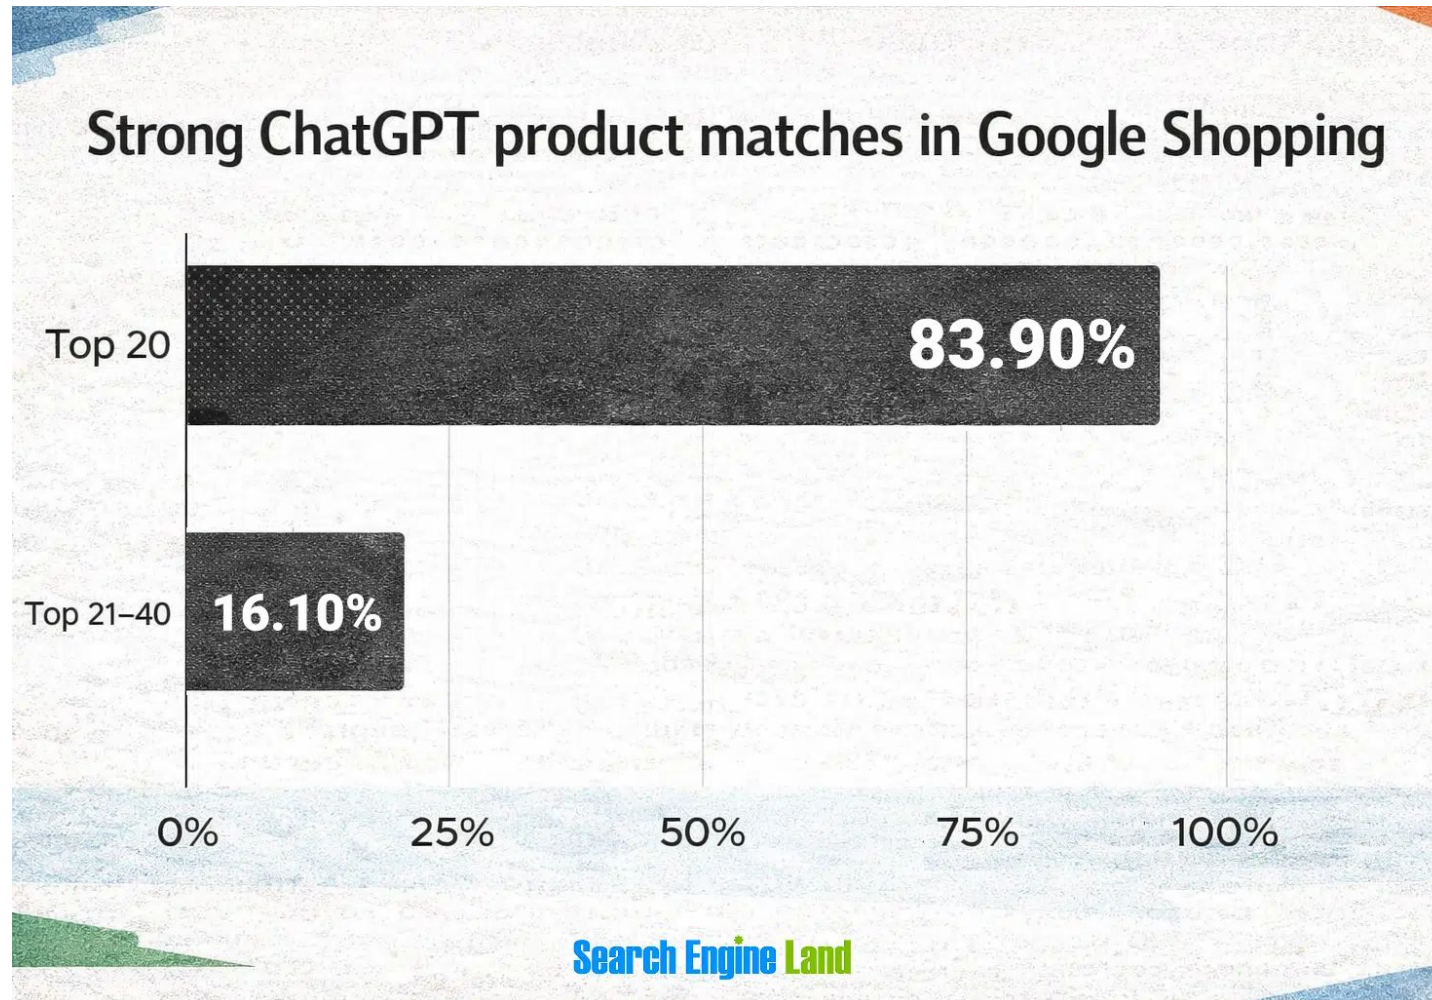

Your brand needs
contextual mentions.

Mentions have the strongest correlation with AI visibility

1. YouTube mentions (being mentioned in many videos)
2. YouTube mention impressions (being mentioned in popular videos)
3. Branded web mentions
4. Branded anchors
5. Branded search volume

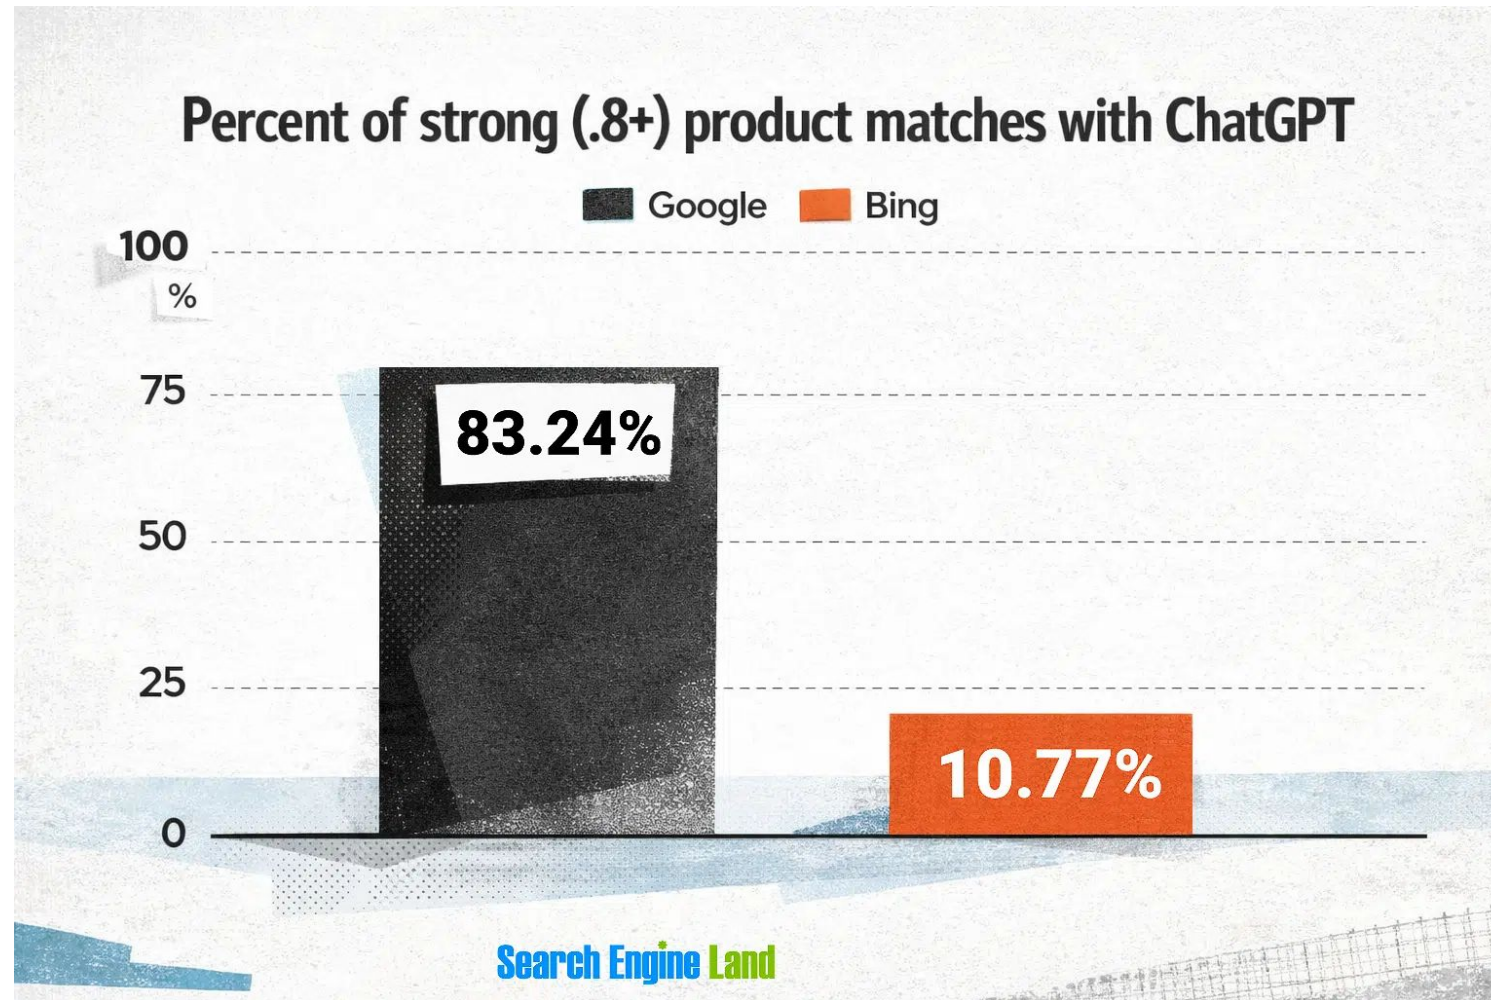

Google Shopping visibility
may carry over to ChatGPT

Study: “ChatGPT favors higher Google Shopping positions”

Source: Search Engine Land “New finding: ChatGPT sources 83%...” (Mar 2026)

Study: “ChatGPT sources 83% of its carousel products from Google Shopping via shopping query fan-outs”

Source: Search Engine Land “New finding: ChatGPT sources 83%...” (Mar 2026)

Your agentic readiness plan

Your products are accessible and readable

1. Audit **robots.txt** and **CDN** access
2. Confirm critical PDP content is **crawlable without JS**
 - a. Check your 3P apps
3. Product feeds are **live, synced, and error free**
4. Fix top **Merchant Center** issues

Product pages provide complete context

1. Surface relevant **dimensions, specs, features, and use cases**
2. Lots of content? Include **headings** for scannability
3. Answer pre-purchase **FAQs**
4. Publish **ratings & reviews** on the page
5. Include required **Product Schema** markup

AI systems still need trust signals

1. Earn **mentions, reviews, links**
 - a. e.g. affiliates, expert reviews, YouTube, etc.
2. Build association with key **categories** and **use cases**
3. Improve visibility in traditional **search** and **shopping** surfaces

Prepare for native agentic checkout

1. Confirm your **integration path**
 - a. Platform or custom
2. Validate checkout inputs: **payment, tax, shipping, returns**
3. Select **eligible products** (e.g. avoid required custom inputs)
